## WORK EXPERIENCE

### Head of Engineering - OviGuide

03/2026 - Present

- Lead engineering for **OviGuide**, an AI counselling co-pilot for engineering admissions, part of a student-platform suite that has served **120,000+ students** and generated **6.5M+ interactions**.
- Built a **comprehensive admission prediction engine** covering nearly every engineering college in India, unifying counselling systems like JoSAA, Comedk, MHT-CET, and EAPCET across **50,000+** college-branch combinations.

### Research Intern (Machine Learning) - IIM Shillong

09/2025 - Present

- Designed a domain-adapted **BiLSTM** with trainable **GloVe embeddings** to classify CFPB complaints (5 classes, 162K narratives) at **88.1% accuracy**, within 0.7 pts of fine-tuned DistilBERT at **12-60x** lower inference cost.
- Built a leakage-resistant evaluation pipeline with cost-sensitive class weighting to boost recall on rare, high-risk complaints; **first-author paper** submitted to **Decision Support Systems** (Elsevier, Q1).

### Machine Learning Intern - iMerit Technology Services Pvt. Ltd.

12/2025 - 03/2026

- Developed a post-hoc **Out-of-Distribution (OOD)** detection pipeline for semantic segmentation in autonomous driving, implementing **MSP**, **ODIN**, and **Energy-score** methods to flag anomalous objects and edge cases; evaluated on KITTI, Fishyscapes, and nuScenes datasets.

## PROJECTS

### Corten - Real-time Container Damage Detection

[Github](#) || [Demo](#)

- Built a **real-time container damage detection** system using a fine-tuned **YOLO** model to identify five damage types (Hole, Dent, Rust, Deframe, Minor-Dent) at **98.7% mAP**.
- Supports image, video, and live-webcam analysis; **FastAPI** + **React**, deployed on **Render** and **Vercel**.

**Technologies:** Python, FastAPI, ONNX Runtime, OpenCV, PyTorch, React, Vercel

### Shatabdi Mahotsav - Andhra University Centenary celebrations Website

[Github](#) || [Demo](#)

- Led frontend development of the **Andhra University's 100-year centenary celebrations website** (Shatabdi Mahotsav 1926-2026), delivering interactive features including an event calendar, live countdown timers, global time-zone display, and a dynamic registration system.

**Technologies:** React, TypeScript, Vite, Tailwind CSS, Framer Motion

### Provenance - Multi-Modal Forensics

[Github](#) || [Demo](#)

- Built a **multi-modal video forensics** system that detects deepfakes, AI-generated media, and miscontextualized footage, each with an explainable **0-100 risk score**.
- Integrated **face-forgery**, **AI-image**, and **CLIP-based context** models behind a **FastAPI** backend and **React** frontend, deployed on **Hugging Face Spaces** and **Vercel**.

**Technologies:** Python, FastAPI, PyTorch, Hugging Face Transformers, OpenCV, CLIP, Docker, React

## ACHIEVEMENTS

- Winner** in **National Cybersecurity Hackathon** organised by Ministry of Electronics and IT.
- Selected** for a summer research internship at **Università della Svizzera italiana (USI)**, Switzerland under **Prof. Paolo Tonella** (Director, Software Institute).
- Qualified GATE 2026** with an All India Rank (AIR) of 17k among 1,000,000+ candidates nationwide.
- Round 2 Qualifier** in **DP World Hackathon 2026** at BITS Pilani.
- Round 3 Qualifier** in **MumbaiHacks 2025**, competing among top national teams.

## EDUCATION

08/2023 - 04/2027 B.Tech in Information Technology at **Andhra University (AUCE)**

CGPA: 8.0/10

## SKILLS

**Languages:** Python, JavaScript, TypeScript, C++, SQL.

**Web Dev:** React, Next.js, Vite, FastAPI, Django, Tailwind CSS, Framer Motion, Node.js, MySQL.

**ML / AI:** PyTorch, TensorFlow, Scikit-learn, Transformers, OpenCV, ONNX, CLIP, GNN, YOLOv5/v8.

**DevOps:** Docker, AWS, GCP, Vercel, REST APIs, GitHub Actions.

**Tools:** Git, Github, Figma, Wix, OAuth, Cursor, Claude Code, Postman.
